

## **BROCHURE**

### **What is the Sun Hospitality Project**

The Project's founding principles are based on promoting

- an efficient networking system on the territory of all active and interested stakeholders;
- an alternative reception strategy based on diverse hospitality levels of quality services;
- out-sourcing strategies that offer immaterial and material services and contribute to the economic wellbeing of the territory;
- selection of residential, catering and self-catering establishments among those that operate within the SUN's territorial premises;

The three Hospitality levels of the Project, Indoor Service, Personal Service and Outdoor Service, are aimed at offering the best of services according to the client's individual needs.

### **Who is it for**

The service is offered to :

- students, professors, researchers from the Second University of Naples and from other Italian or foreign universities and research institutes
- local public and private accommodation, catering structures and information establishments who provide material and immaterial services;

### **How does it work**

The Project bases its main strategy on establishing a network of conventions with the local businesses and main public authorities, including the five municipalities that house the University's multicampus structure.

The SUN Hospitality brand is awarded to those establishments that reflect the Project's mission to increase the economic activity of the local businesses involved in contributing to the wellbeing and sustainable development of the entire territory.
